

**KOLISEUM**

Sociable Fun VR

# KOLISEUM™

## THE PLATFORM

**Nostalgia and high-tech** : a quantum leap in technology, bringing together high-performance software, hardware and precision mechanics.

Players feel the familiar sensations as with classic Table Soccer, but with an exhilarating twist.

The platform allows to create games that fit a two-handle setup, generating numerous possibilities. New games are conceived and developed whereby players and teams can compete in intense and highly spectacular games.

In addition to Table Soccer, Ice Hockey and other games to be installed on the same platform.

# KOLISEUM™

## DASHBOARD & MENU

### Administrator Dashboard

An online dashboard which provides the operator full statistics on usage, players and game settings.

The dashboard communicates with the Koliseum and automatically logs every game. It also allows the operator to choose how the game behave, including choice of teams and/or stadiums available to the player, game time, bonus items, AI difficulty and more.

### Streamlined onboarding players menu

The players are greeted with an easy to use and understand series of introductory screens that allow them to set their preferences (depending on the choices of the operator) as well as understand how to play the game. It also makes sure that all players are ready to play before starting the game.

## TECHNICAL SPECIFICATIONS

Number of Players:	1 to 4
Floor area:	5.5 square meters (incl. players)
Table dimensions:	155cm x 80cm (125 incl. rods) x 95 cm

# Koliseum Soccer VR

# KOLISEUM SOCCER VR™

## THE GAME

Based on the 20th century's most iconic and popular game Koliseum Soccer VR™ is a multi-Award Winning virtual reality game that takes Table Soccer (Foosball, Kicker, Baby Foot etc) to a new dimension. An exhilarating experience, adding surprising actions, emotions, tensions, and twists. It merges the familiar physical actions of a traditional Table Soccer with the unique sensations of Virtual Reality.

**Guaranteed mind-blowing!**

# KOLISEUM SOCCER VR™

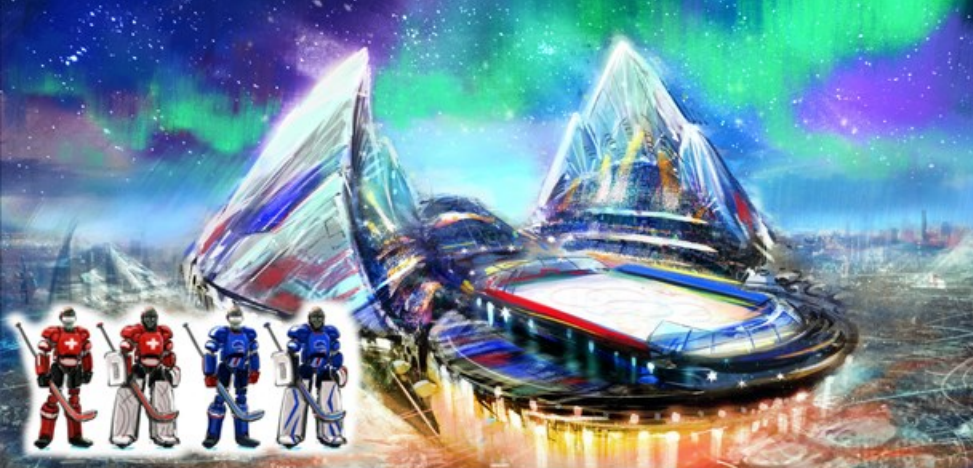

## THE GAMEPLAY

Special **unique features** such as dribbles, lobs and **various bonuses** directly inspired from the arcade world (multi-ball, death-ball, shields, bouncing-balls,...) significantly change the gameplay and the score of a match. Mastering their tactical dimension can be a real advantage.

**Dedicated to the general public** rather than seasoned "Gamers", Koliseum Soccer VR™ **requires no special skill or training. Play away, one and all!**

With embedded artificial intelligence, the Koliseum Soccer VR™ **can be played by 1, 2, 3 or 4 players.**

# CUSTOMIZATION

All the data to be tracked in the [admin dashboard](#).

# ABOUT KOLISEUM

Koliseum's mission: Sociable and friendly VR

Virtual Reality is a paradoxical experience: never before has a media pushed immersion into alternative fantasy worlds so far, however with risks of driving players into social isolation.

**KOLISEUM**'s mission is to overcome this shortcoming by creating sociable extraordinary Virtual Reality (VR) content. Blurring the boundaries between the real and the virtual, while privileging the experiences that create **real human interaction with social team communications** and personal links.

**KOLISEUM** is a cross-platform content producer based in Geneva (Switzerland). Our team includes creators and developers whose work in Virtual Reality has earned awards at Los Angeles' SIGGRAPH , the VR Hollywood Summit, a grant from Epic Games for "outstanding work", and **three recent Awards** with the Koliseum Soccer VR™ .

We develop attractions based on extremely popular classic arcade games, multiplying the pleasure of players to compete against each other, and **collaborating and interacting as physical teams** around common and motivating subjects.

Founded in November 2017, **KOLISEUM** is a brand of Kynoa SA currently employing a dynamic dedicated team -creative directors, visual artists, animators, and developers.

**KOLISEUM** delivers completely original virtual reality environments and characters, along with animations, visual effects, and dedicated user interfaces.
